

GuideLiner V3 Catheter

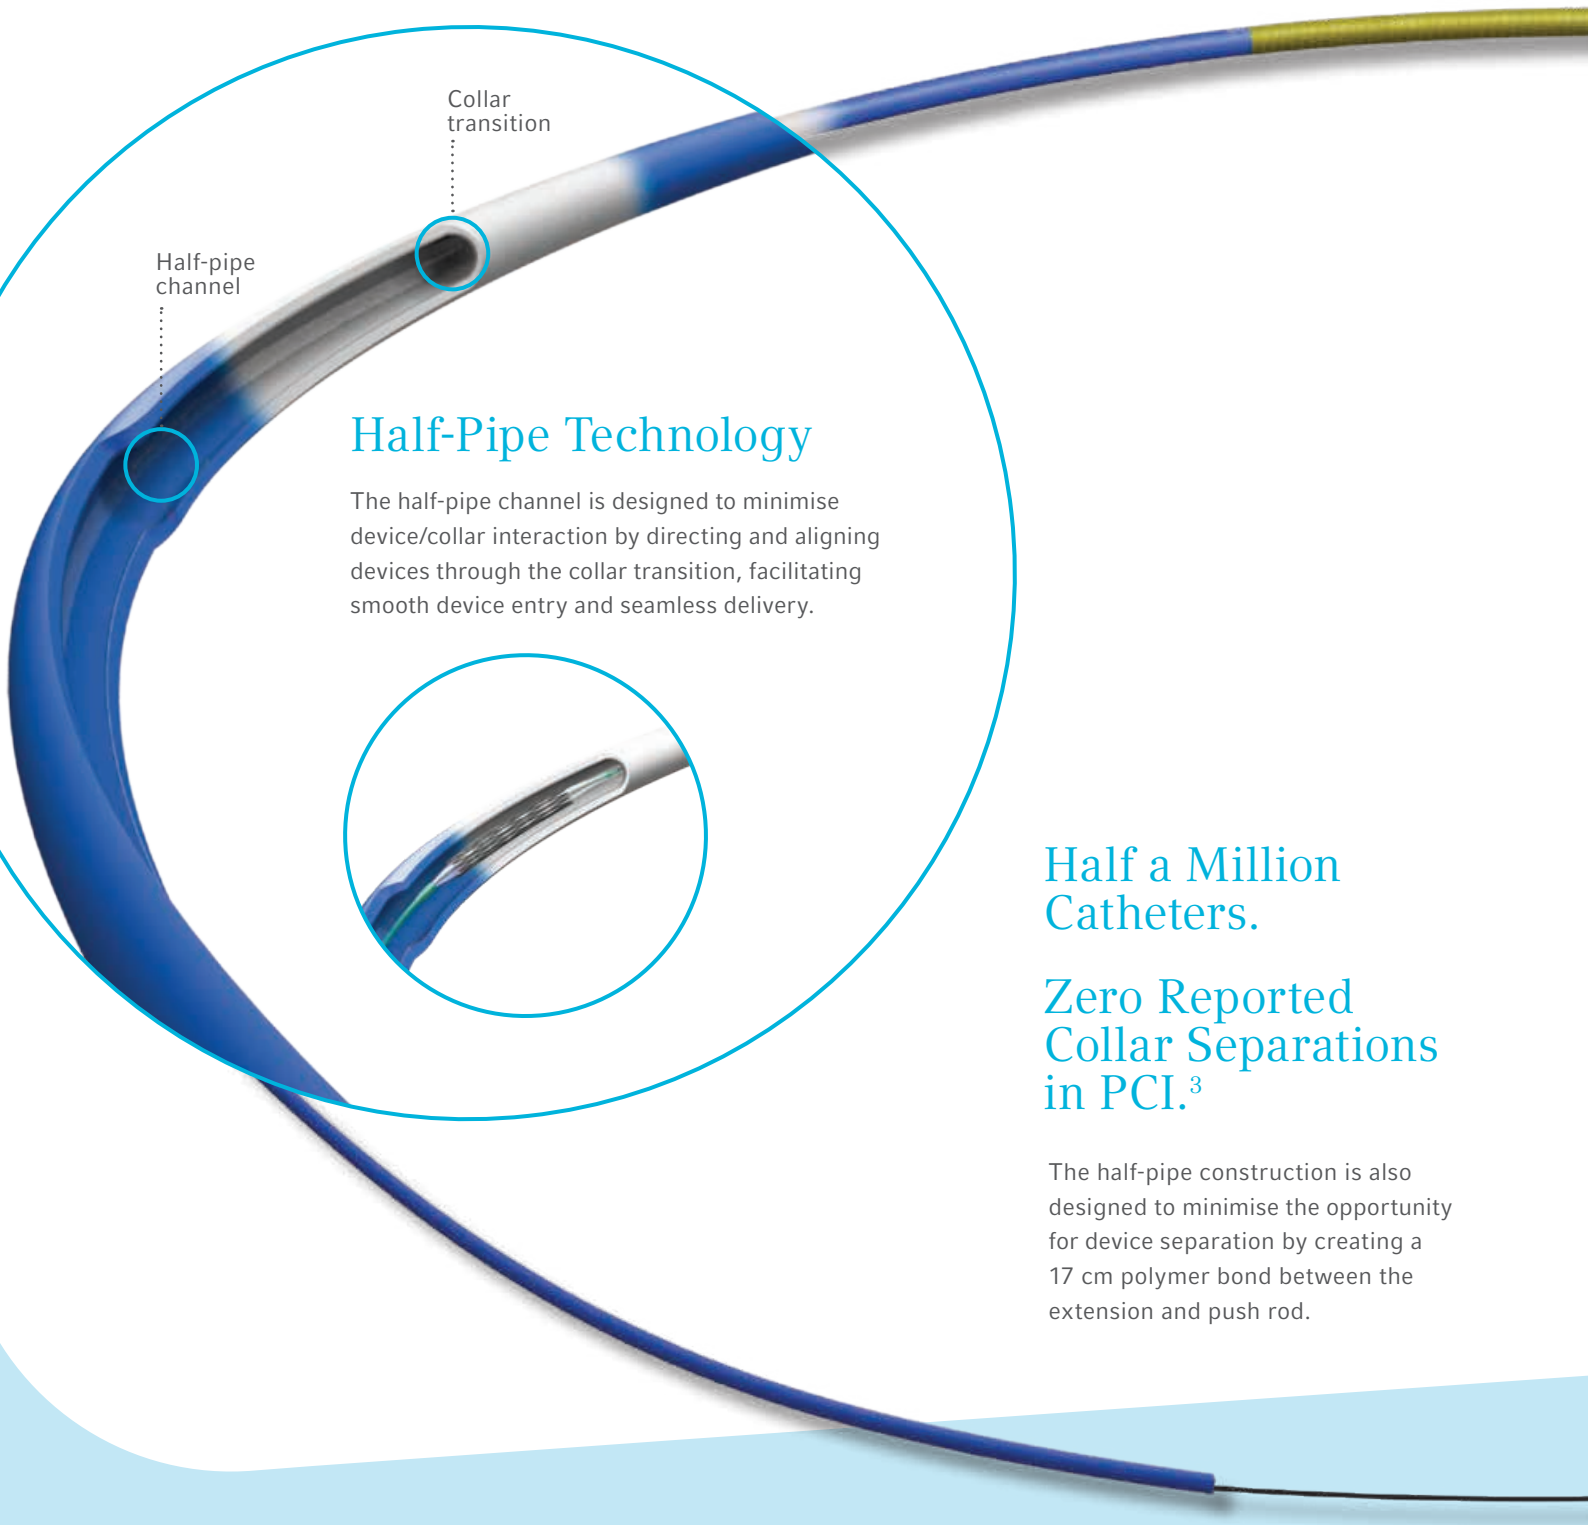

Guide Extension Catheter With Half-Pipe Technology

Teleflex

Designed to Perform

It's not just the proprietary half-pipe technology that sets the GuideLiner V3 Catheter apart. The coil-reinforced extension is specifically designed to enable dependable deep-seating for the delivery of interventional devices to distal locations.

Half-Pipe Technology

The half-pipe channel is designed to minimise device/collar interaction by directing and aligning devices through the collar transition, facilitating smooth device entry and seamless delivery.

Half a Million Catheters.

Zero Reported Collar Separations in PCI.[3]

The half-pipe construction is also designed to minimise the opportunity for device separation by creating a 17 cm polymer bond between the extension and push rod.

Tortuosity Tested

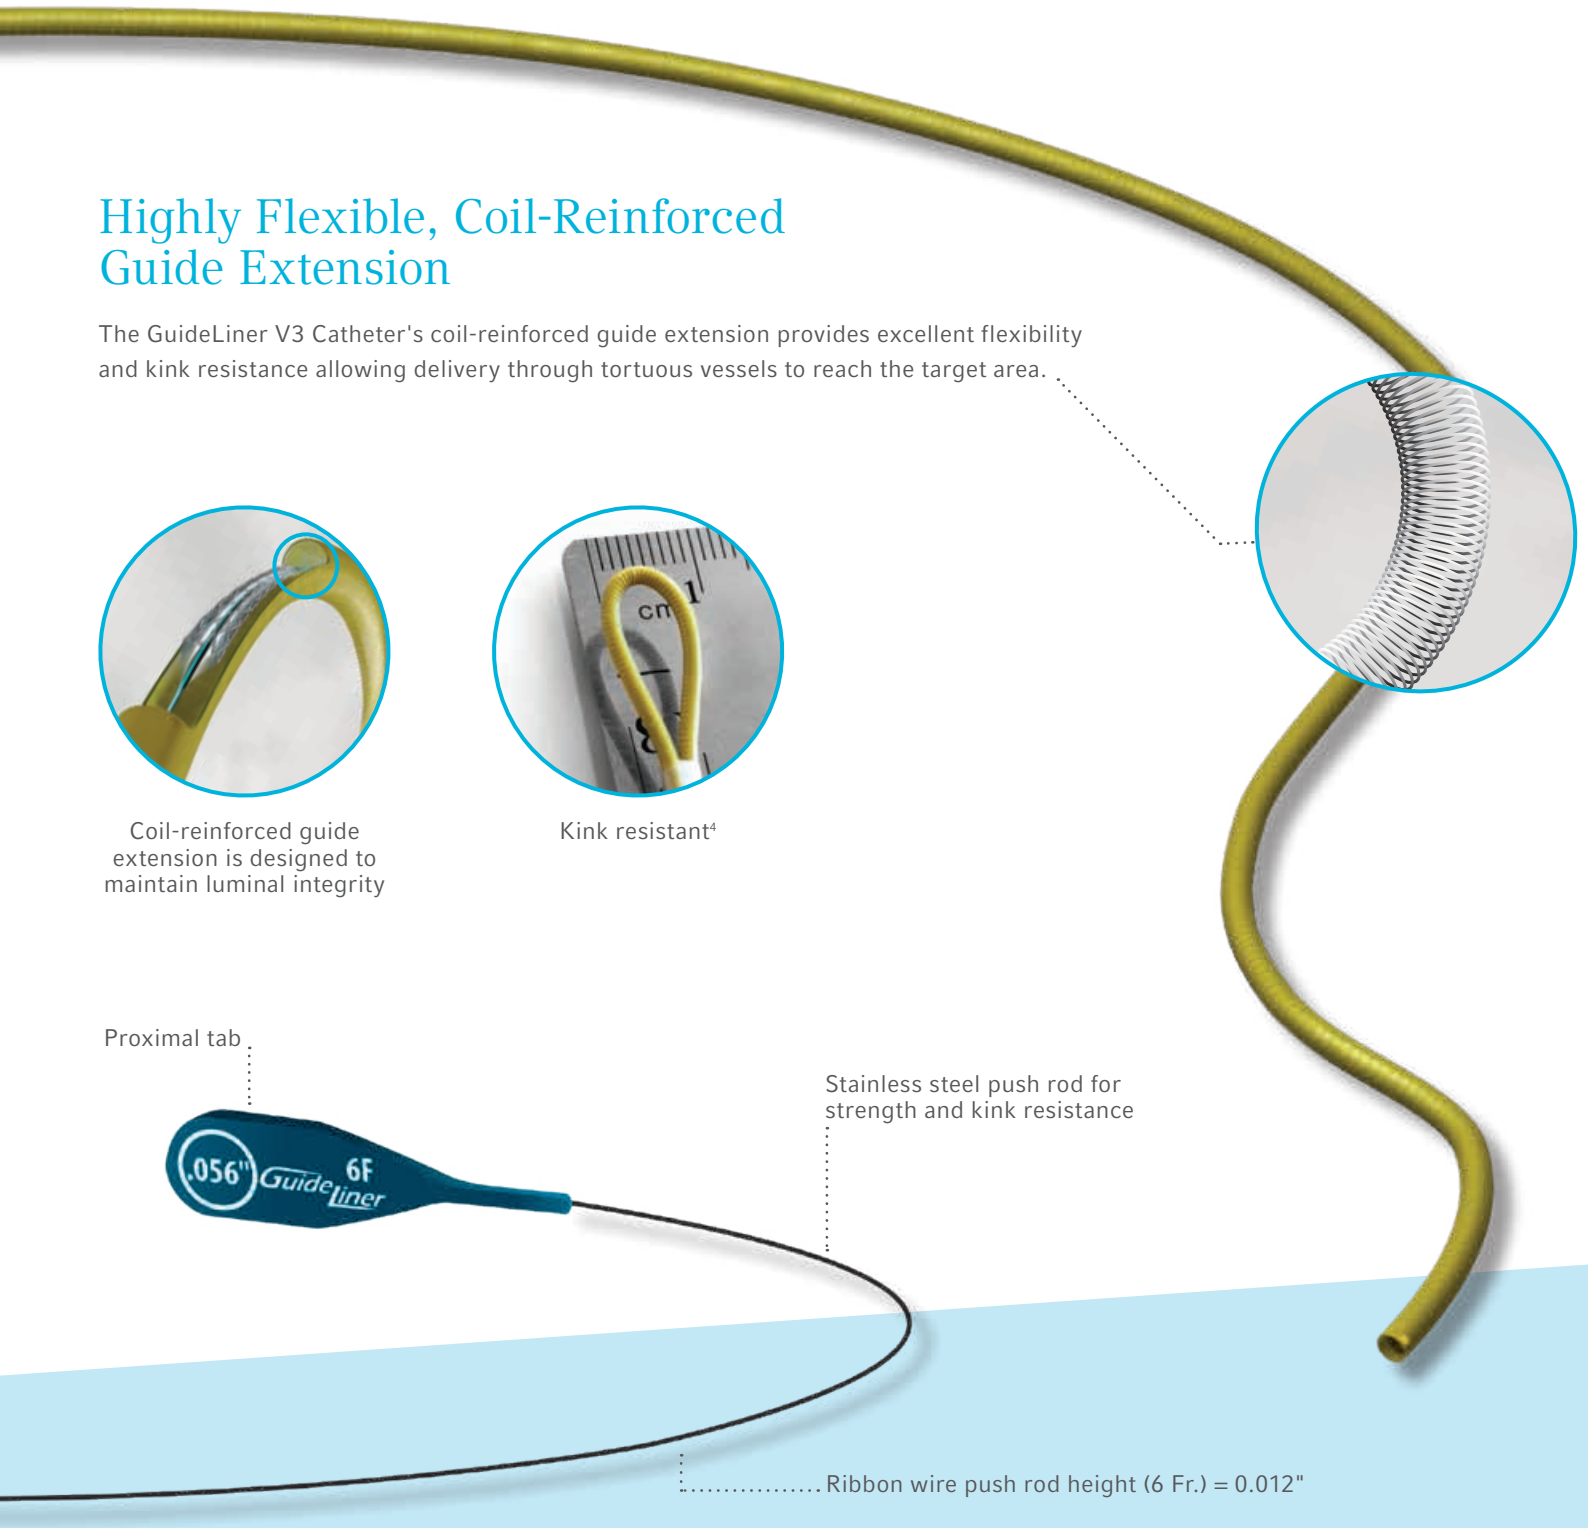

From challenging lesions to impossibly acute angles, percutaneous coronary interventions have grown more complex. Since being introduced, GuideLiner catheters have been recognised by interventionalists as essential tools for addressing difficult anatomies.

Highly Flexible, Coil-Reinforced Guide Extension

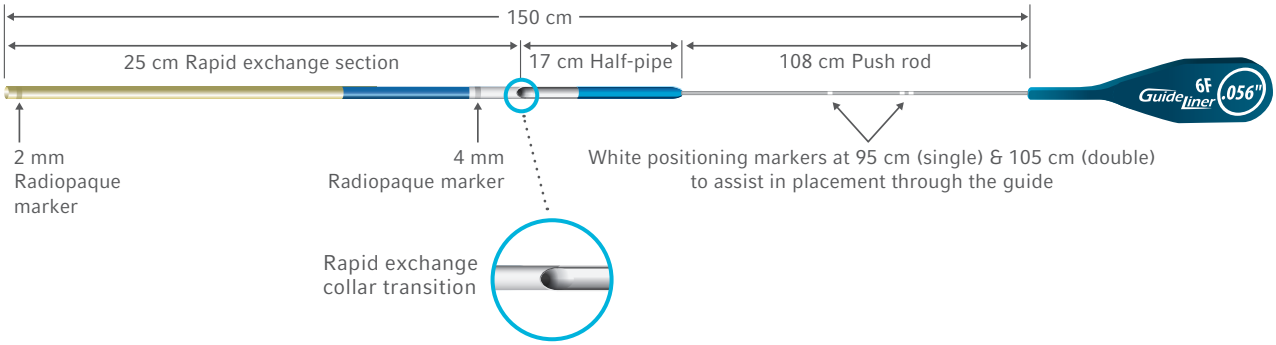

The GuideLiner V3 Catheter's coil-reinforced guide extension provides excellent flexibility and kink resistance allowing delivery through tortuous vessels to reach the target area.

Coil-reinforced guide extension is designed to maintain luminal integrity

Kink resistant[4]

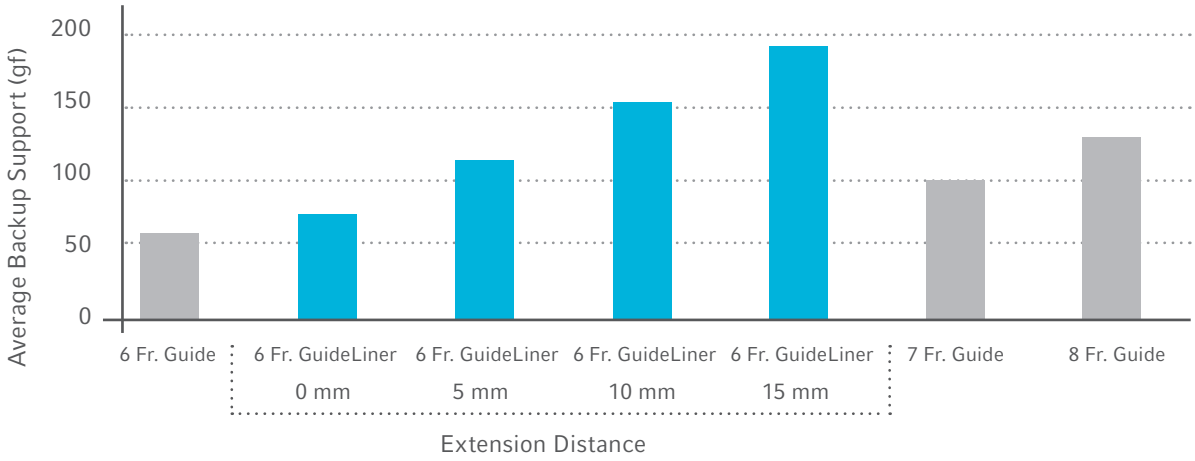

GuideLiner V3 Catheter Dimensions

Added Backup Support

With as little as 5 mm of extension, bench testing has shown that the GuideLiner V3 Catheter significantly increases the backup support of a 6 Fr. guide catheter.

Testing completed by Vascular Solutions, Inc. Data on file. Comparative data may not be indicative of clinical performance.

GuideLiner V3 Catheter

PRODUCT NO.	SIZE	REQUIRED GUIDE CATHETER I.D.	PUSH ROD O.D.	GUIDE EXTENSION I.D.	TIP O.D.	RAPID EXCHANGE LENGTH	WORKING LENGTH

GuideLiner Catheters are intended to be used in conjunction with guide catheters to access discrete regions of the coronary and/or peripheral vasculature, and to facilitate placement of interventional devices.

Packaged in quantities of 1 unit per box.

Beyond Tried. True.

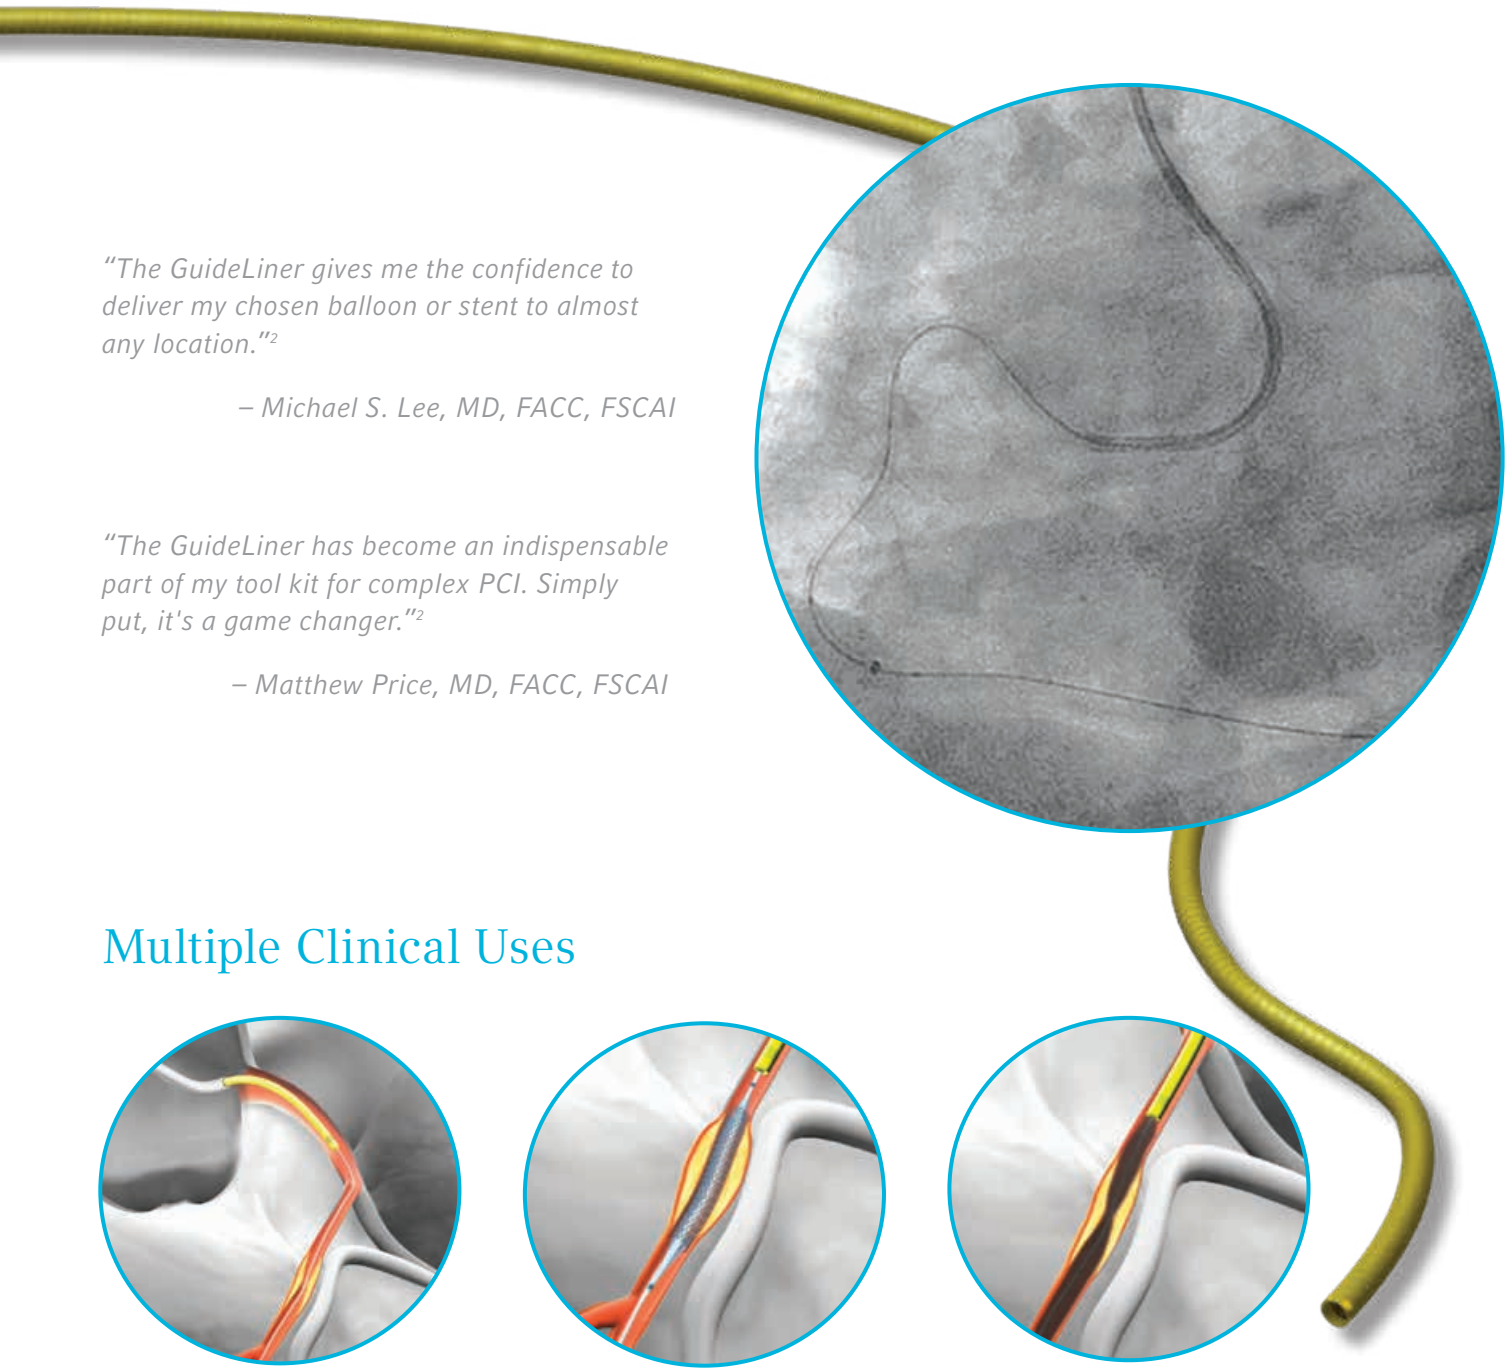

In 2009, the GuideLiner Catheter revolutionised the concept of guide extension, creating new possibilities in interventional cardiology. Now in its third generation, the GuideLiner V3 Catheter continues to build on a history of innovation and performance - one that's been demonstrated with more than half a million catheters in cath labs around the world.[1]

"The GuideLiner gives me the confidence to deliver my chosen balloon or stent to almost any location."[2]

– Michael S. Lee, MD, FACC, FSCAI

"The GuideLiner has become an indispensable part of my tool kit for complex PCI. Simply put, it's a game changer."[2]

– Matthew Price, MD, FACC, FSCAI

Multiple Clinical Uses

Coaxial alignment and backup support

Deep-seating for distal device delivery

Selective delivery of contrast

Teleflex is a global provider of medical technologies designed to improve the health and quality of people's lives. We apply purpose driven innovation – a relentless pursuit of identifying unmet clinical needs – to benefit patients and healthcare providers. Our portfolio is diverse, with solutions in the fields of vascular and interventional access, surgical, anesthesia, cardiac care, urology, emergency medicine and respiratory care. Teleflex employees worldwide are united in the understanding that what we do every day makes a difference. For more information, please visit teleflex.com.

Teleflex is the home of Arrow, Deknatel, LMA, Pilling, QuikClot, Rüsch, UroLift and Weck – trusted brands united by a common sense of purpose.
