

Turnpike Catheter

Navigate Complex Interventions at Every Turn

Teleflex

Keep Driving Forward

The portfolio of Turnpike Catheters places the power in your hands. Navigate tortuous anatomy with agility and precision. No matter the challenge, Turnpike Catheters are designed to help simplify the journey.

*"Turnpike Catheters have a vast utility. They've given me the confidence to tackle a wide variety of highly complex lesions."**

Jon Robken, MD
Cardiovascular Medicine, P.C.

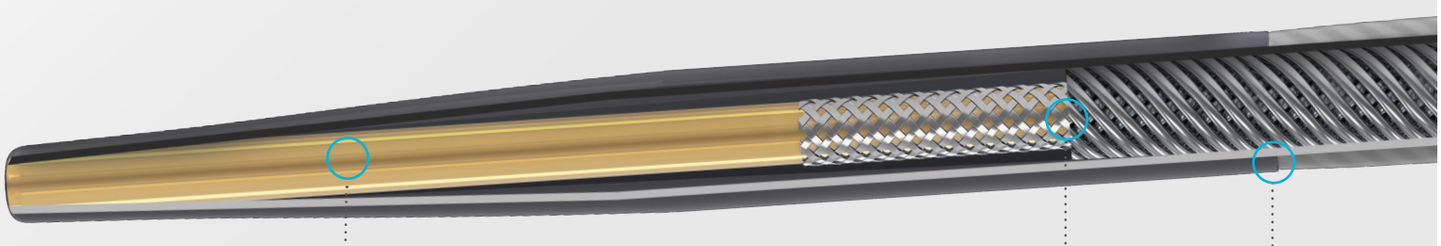

* This statement reflects the personal experience and opinion of the physician.

Ideal Combination of Flexibility and Torque Response

Turnpike Catheters feature a unique five-layer shaft construction that provides flexibility, torque and tracking over a 0.014" guidewire in complex coronary interventions.

Outmaneuver Roadblocks

- Complex lesions
- Extreme tortuosity
- Guidewire support

Enhanced Guidewire Movement
An inner PTFE liner that spans the entire catheter to ensure smooth guidewire interaction throughout the case

Responsive and Kink Resistant
Dual-layer coils and a braid make for an ideal combination of flexibility and torque response

Exceptional Delivery
A polymer outer layer, paired with a hydrophilic coating on the distal 60 cm, provides excellent lubricity for delivery

Turnpike LP

Dual coil tapers down to single coil 21 cm from distal tip for lower profile and increased flexibility in the distal shaft and tip

Antegrade | Retrograde

Turnpike Catheter

Standard version, flexible tip

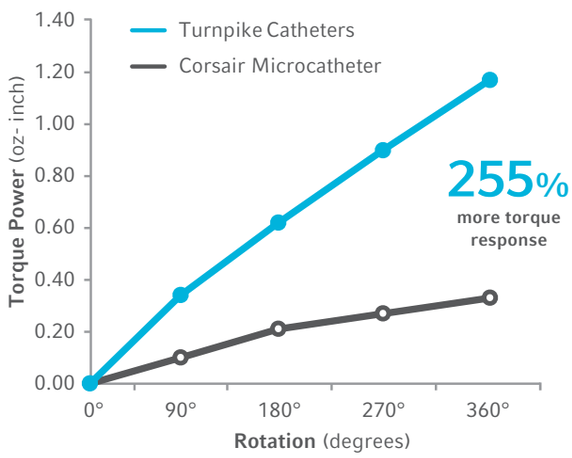

Workhorse antegrade device, as well as retrograde escalation device for increasing torque power and guidewire support[1] in resistant septal collaterals

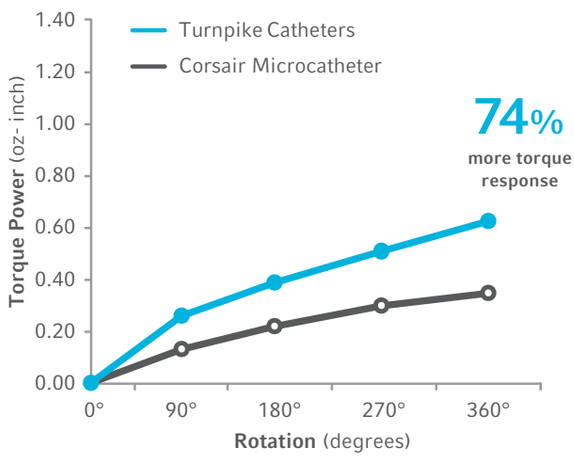

5-layer shaft construction includes dual-layer coils and a braid for an ideal combination of flexibility and torque response

Superior Bidirectional Torque Response*

Clockwise Torque Test

Counter-Clockwise Torque Test

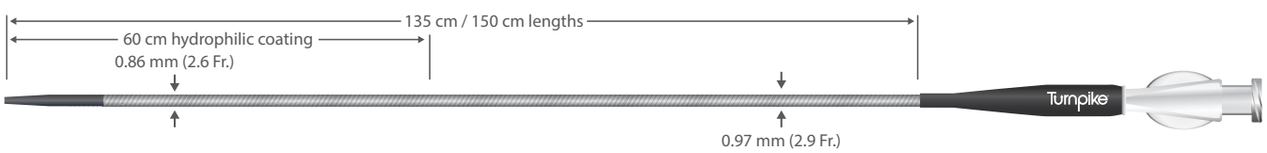

* All values based on bench test data averages, n=3, performed by Teleflex. Bench test results may not necessarily be indicative of clinical performance. Data on file.

Packaged in quantities of 1 unit per box.

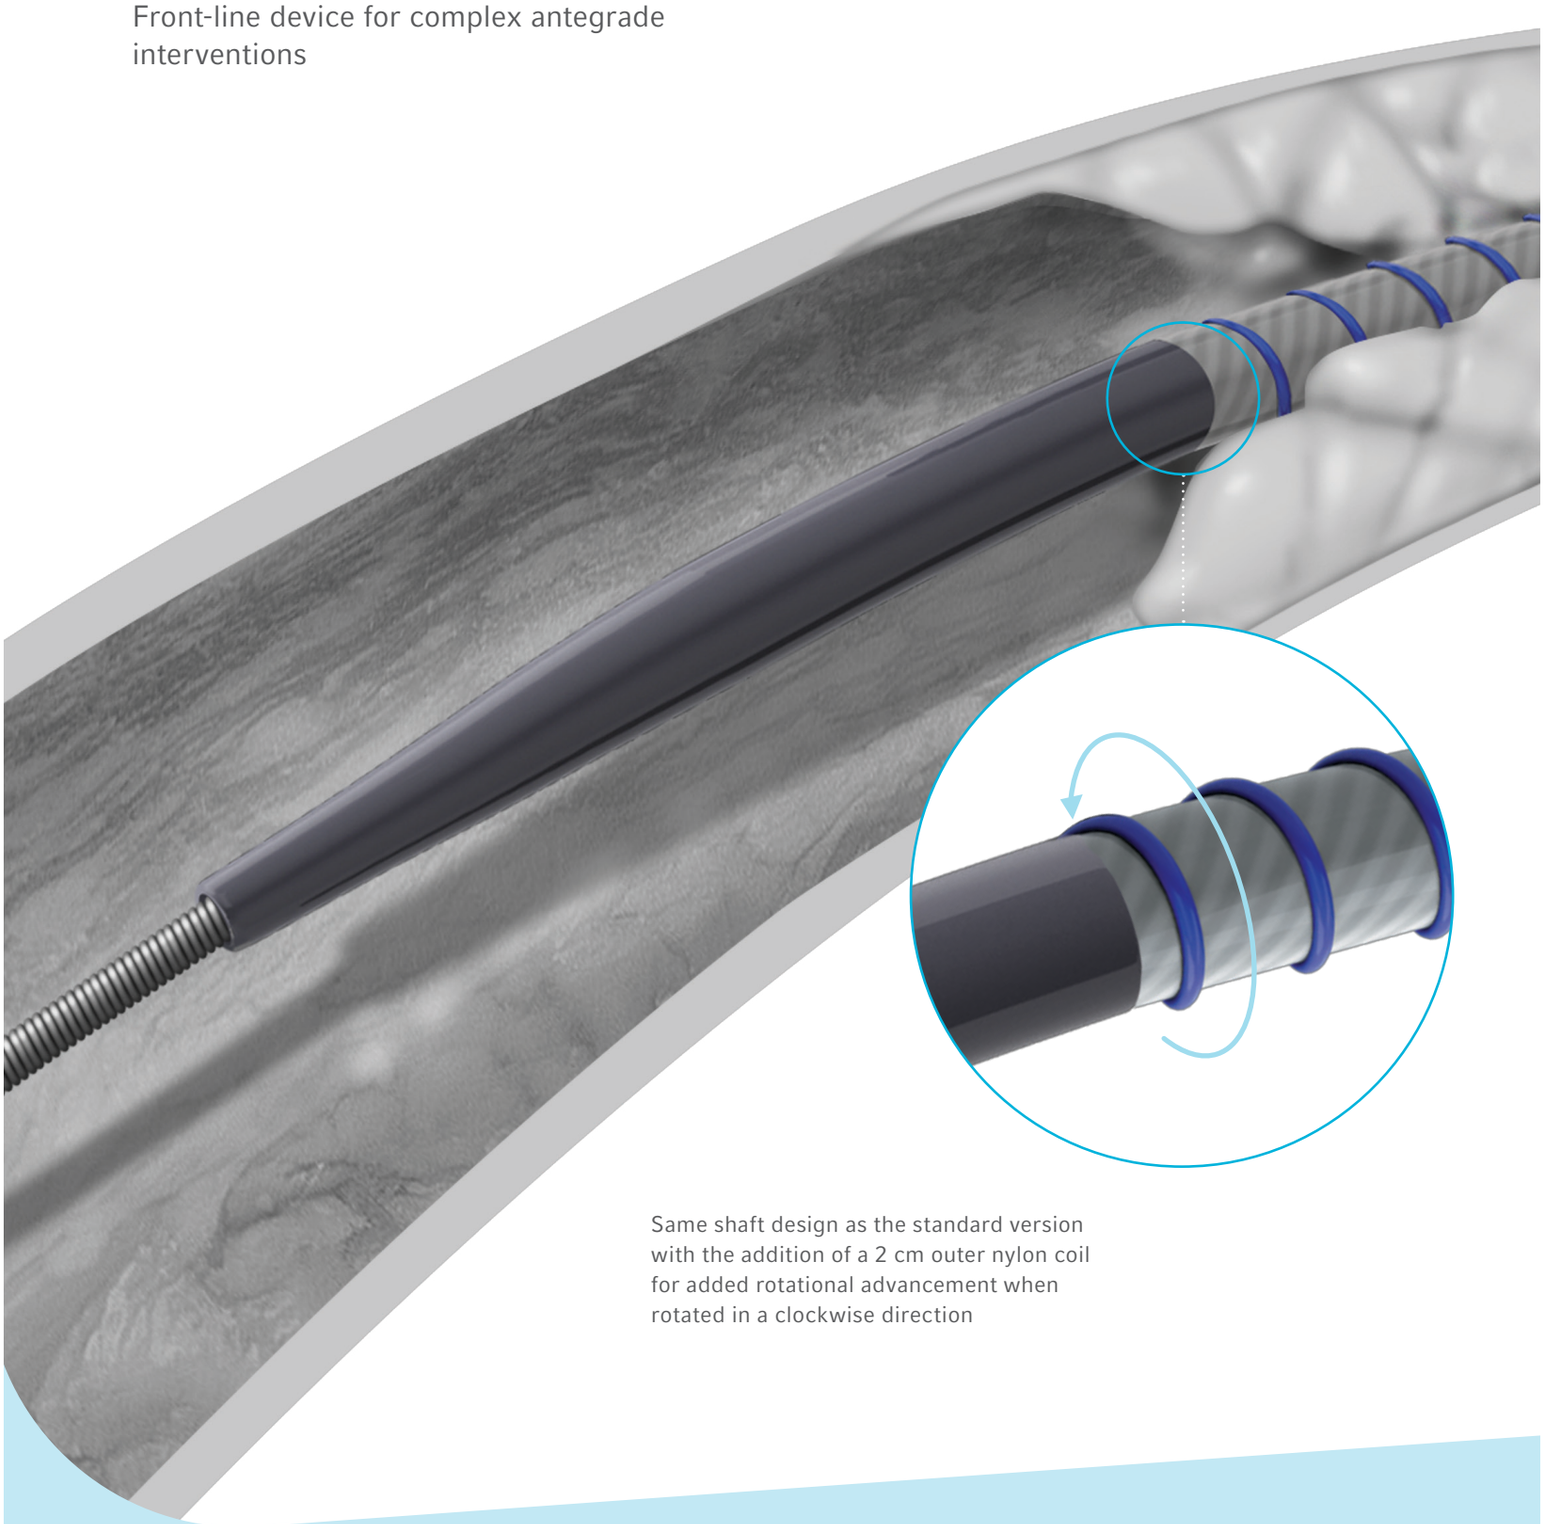

1 Compared to Turnpike LP Catheter. Data on file.

Antegrade

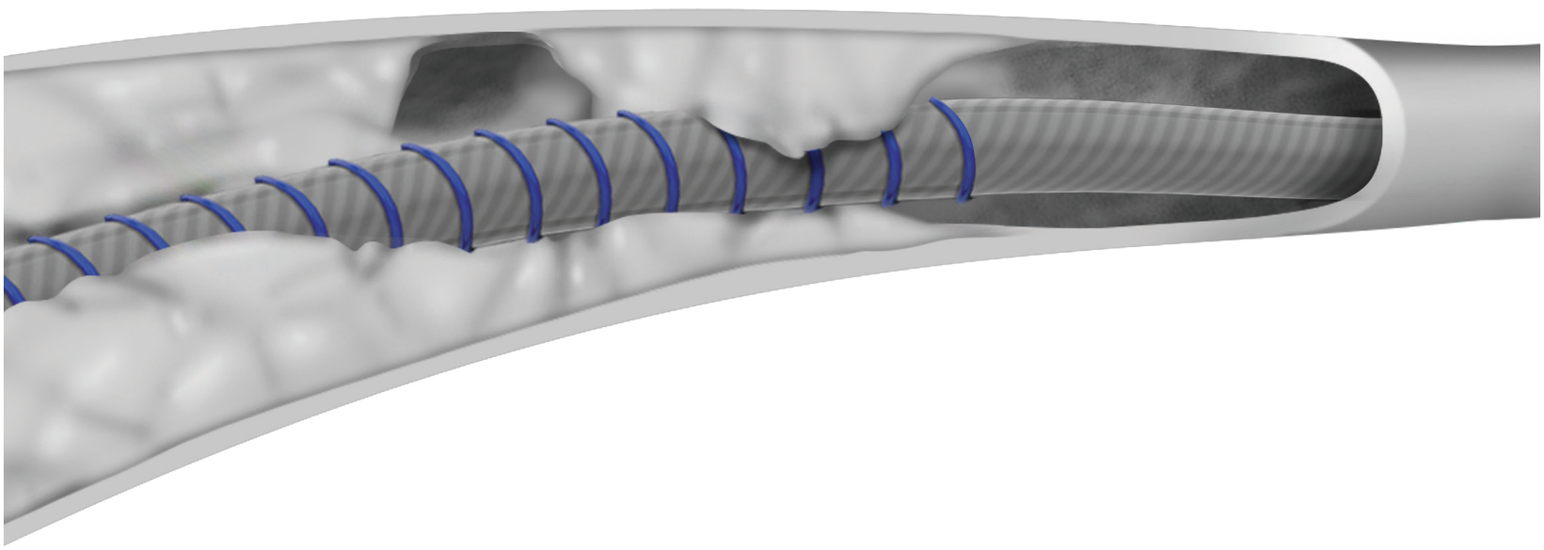

Turnpike Spiral Catheter

Spiral shaft, flexible tip

Front-line device for complex antegrade interventions

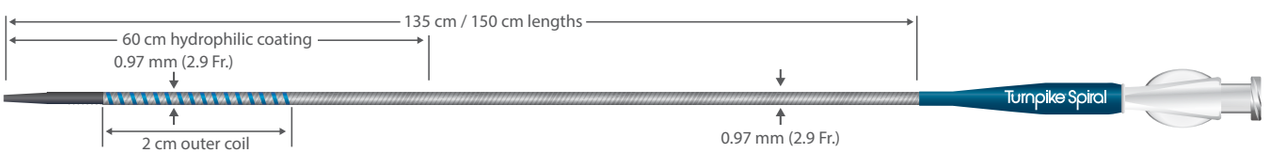

Same shaft design as the standard version with the addition of a 2 cm outer nylon coil for added rotational advancement when rotated in a clockwise direction

Ordering Information

MODEL	VERSION	WORKING LENGTH	PROXIMAL SHAFT O.D.	DISTAL SHAFT O.D.	DISTAL TIP O.D.	COMPATIBLE GUIDEWIRE DIAMETER	COMPATIBLE GUIDE CATHETER SIZE
5640	Turnpike Spiral	135 cm	2.9 Fr. 0.97 mm / 0.038"	2.9 Fr. 0.97 mm / 0.038"	1.6 Fr. 0.53 mm / 0.021"	≤ 0.014" (0.36 mm)	≥ 5 Fr. ≥ 1.42 mm / 0.056" I.D.

Packaged in quantities of 1 unit per box.

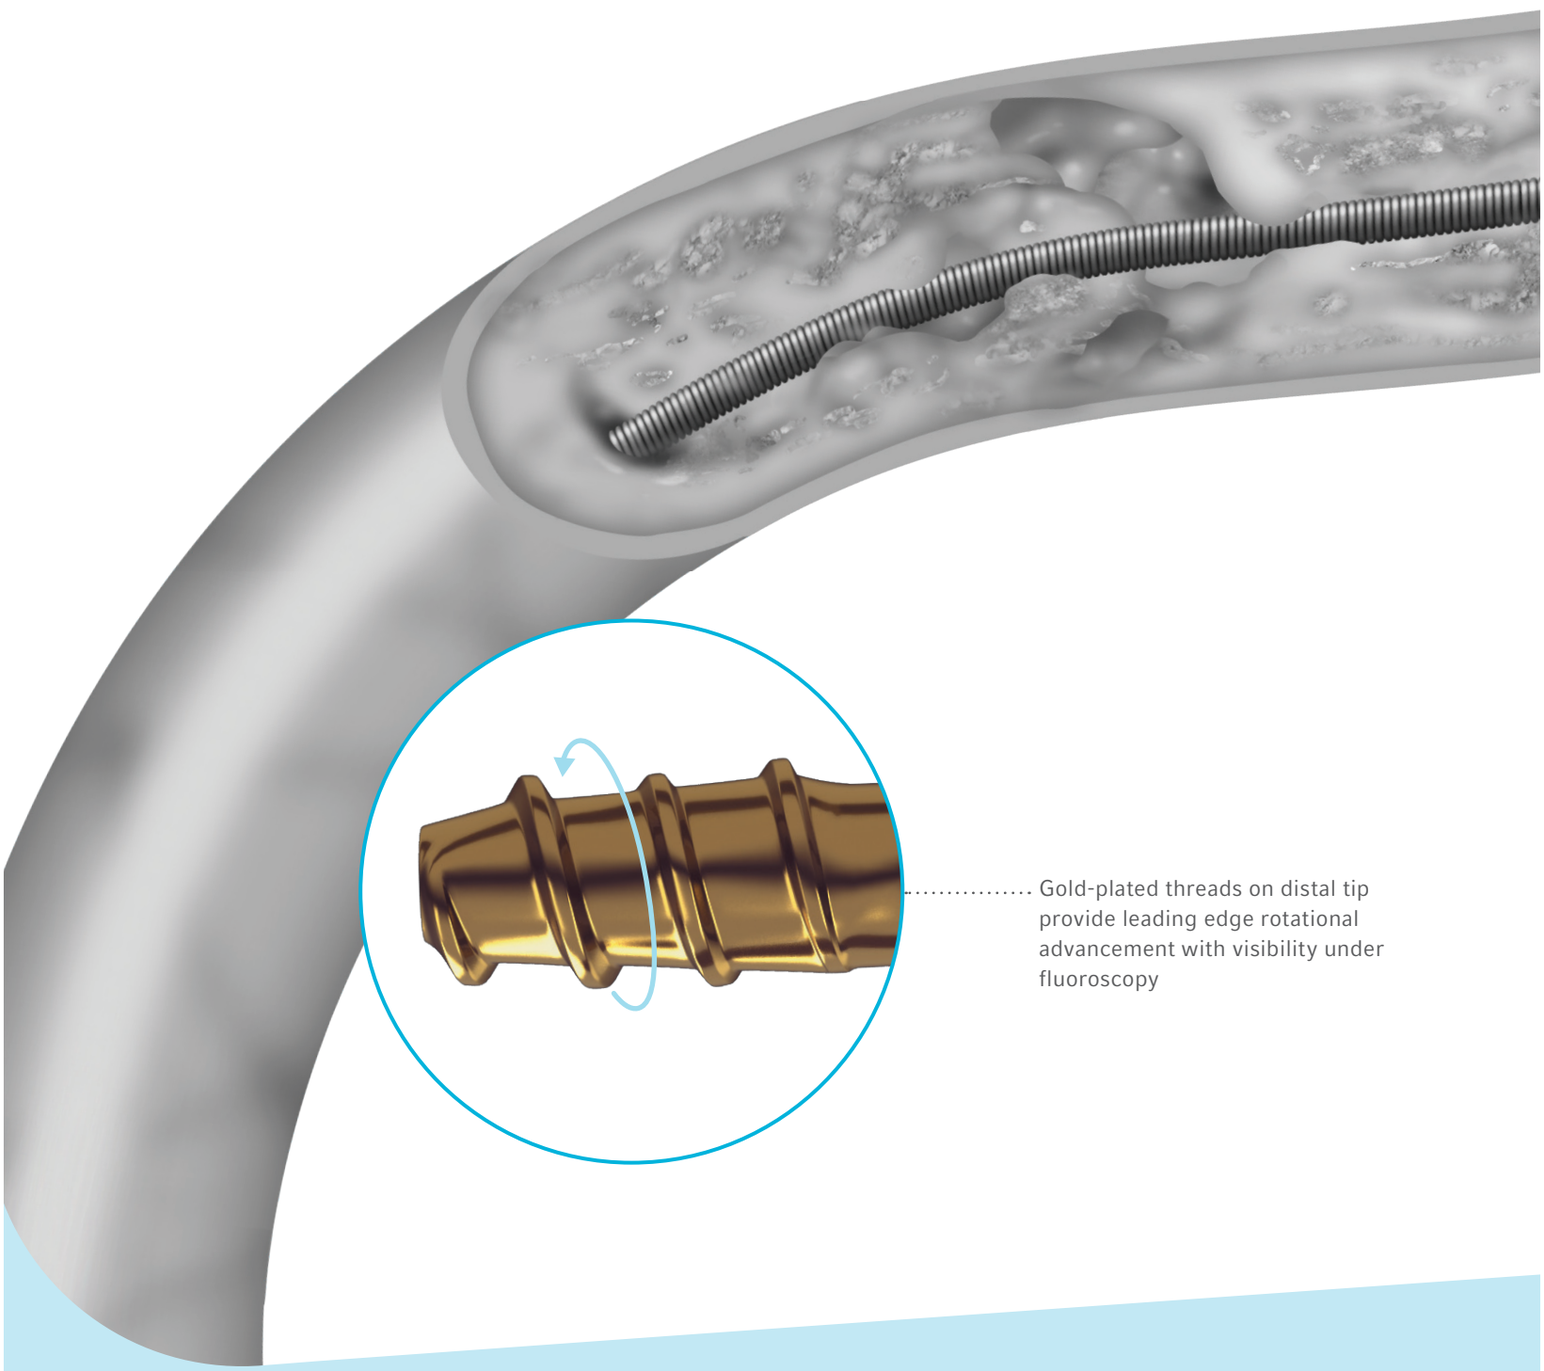

Antegrade

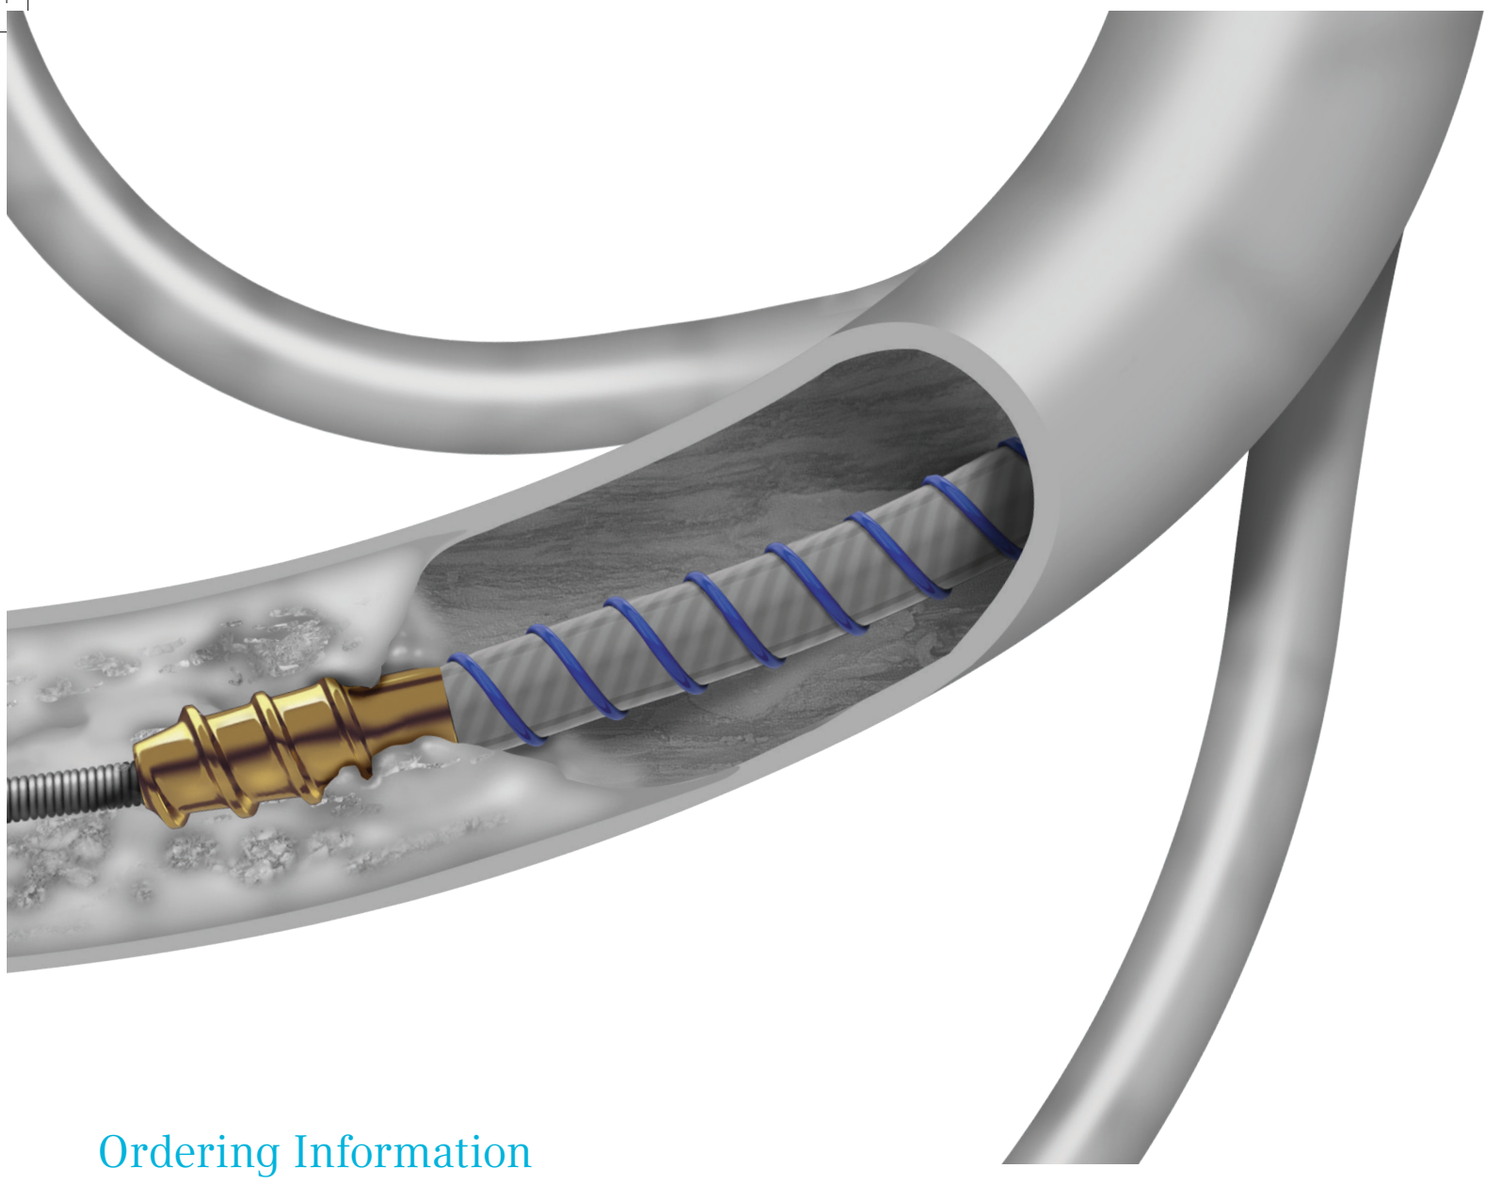

Turnpike Gold Catheter

Spiral shaft, threaded metal tip

Antegrade escalation device for resistant lesions

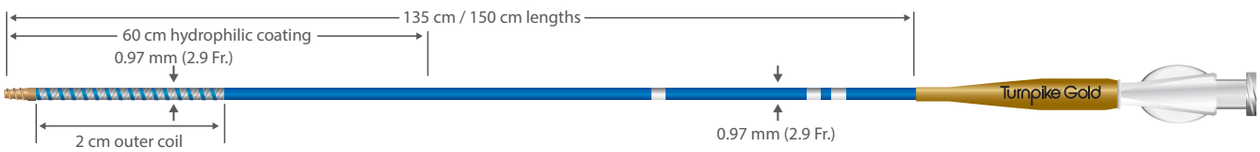

Gold-plated threads on distal tip provide leading edge rotational advancement with visibility under fluoroscopy

Packaged in quantities of 1 unit per box.

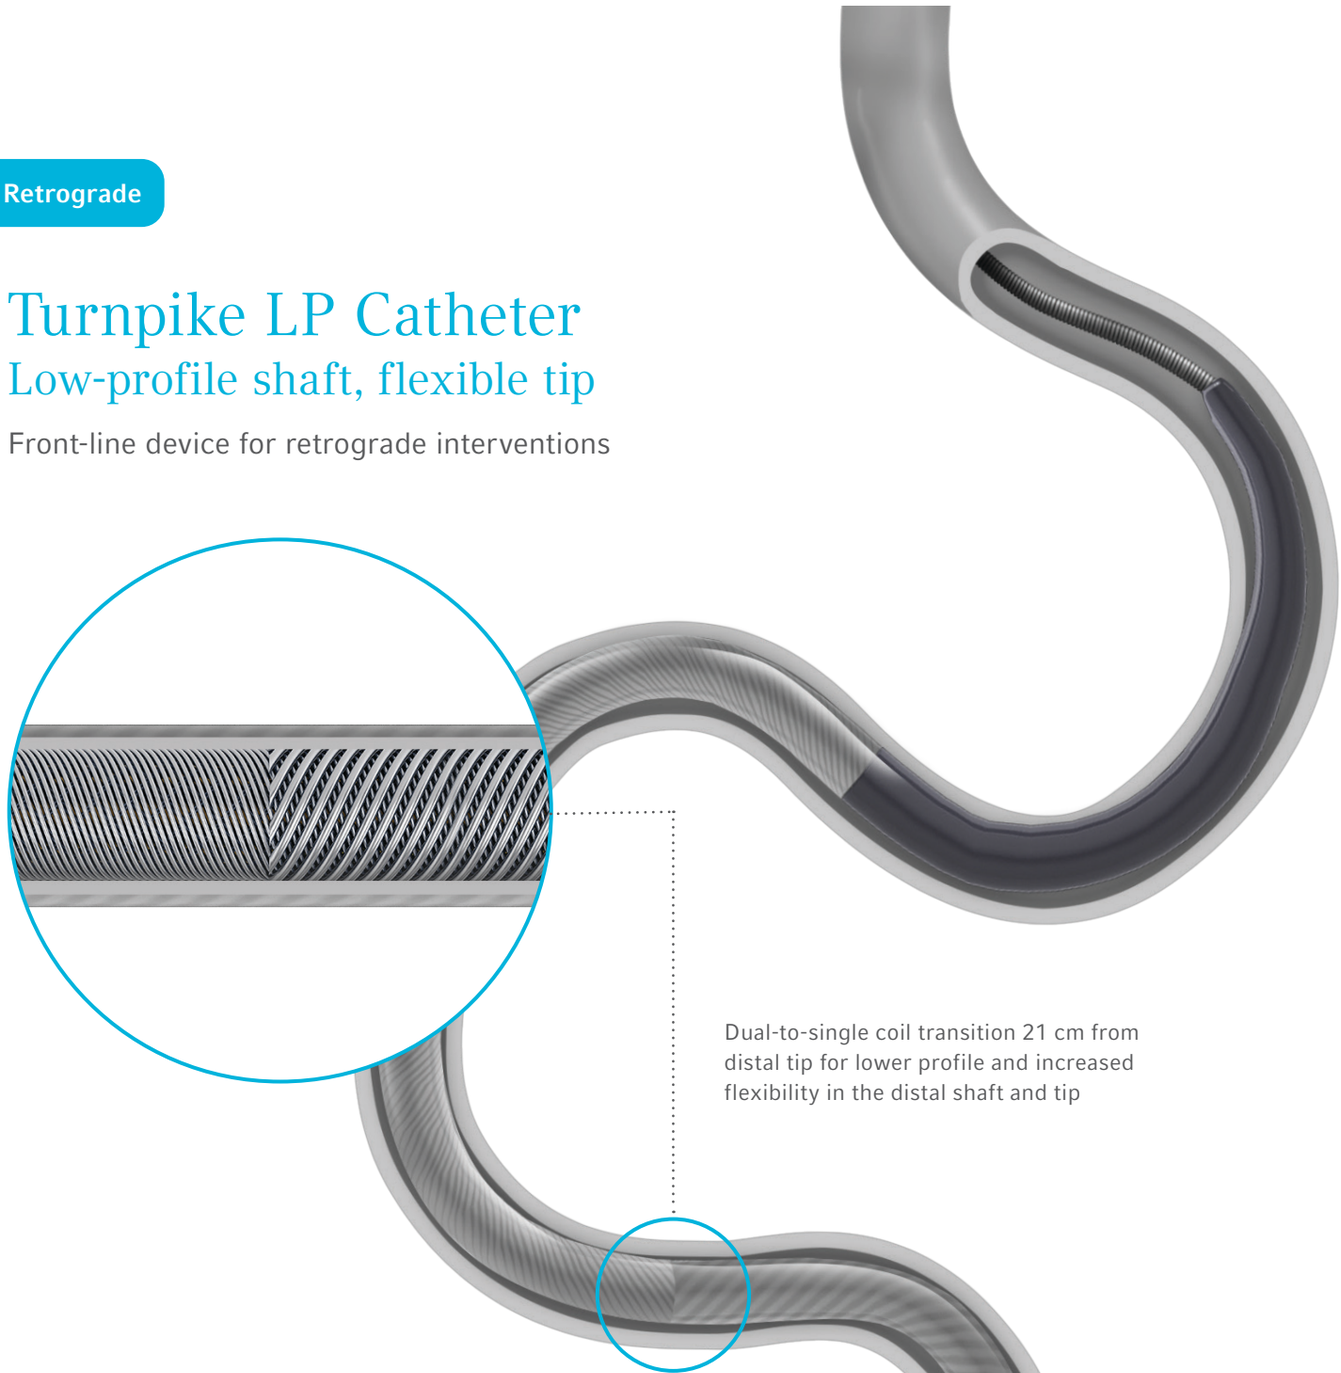

Retrograde

Turnpike LP Catheter

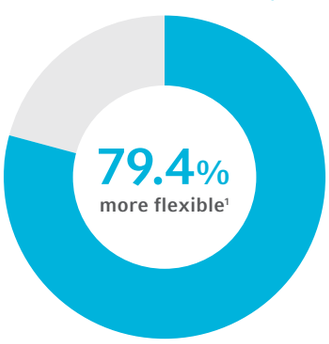

Low-profile shaft, flexible tip

Front-line device for retrograde interventions

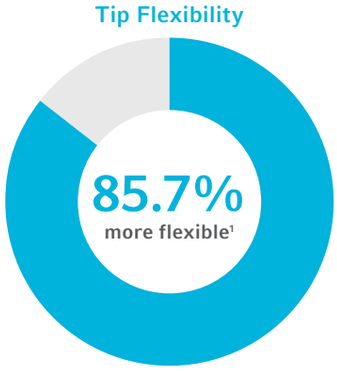

Dual-to-single coil transition 21 cm from distal tip for lower profile and increased flexibility in the distal shaft and tip

Distal Shaft Flexibility

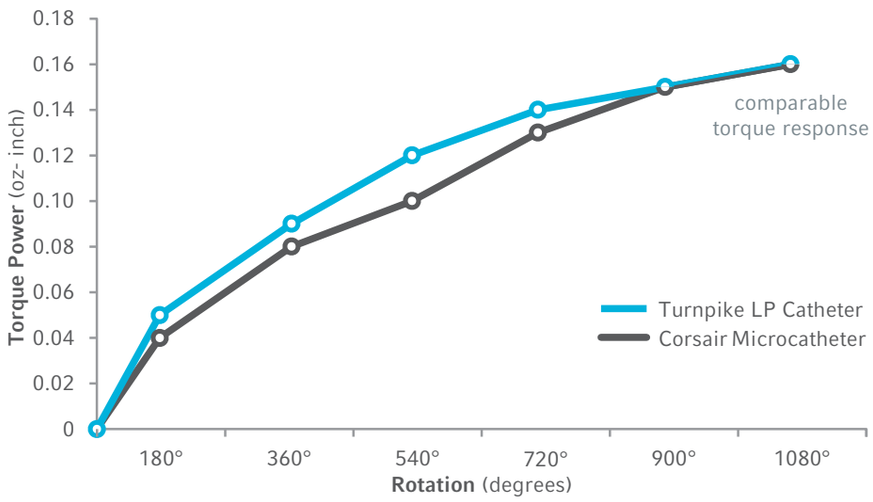

Tip Flexibility

Turnpike LP Catheter offers impressive torqueability with a smaller crossing profile than the Corsair Microcatheter

Clockwise Torque Response[2]

Torqueable Microcatheters

15% smaller crossing profile*

- Turnpike Catheter 2.6 Fr.
- Corsair Microcatheter 2.6 Fr.
- Turnpike LP Catheter 2.2 Fr.

Non-Torqueable Microcatheters

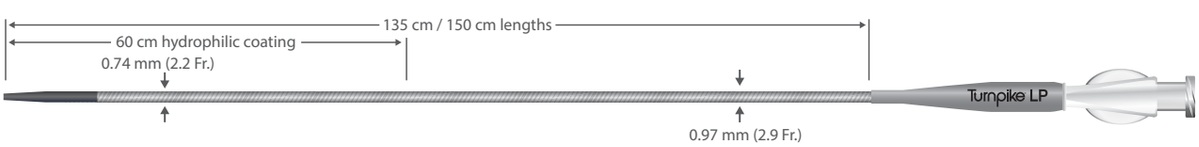

- Caravel Microcatheter 1.9 Fr.
- Finecross Microcatheter 1.8 Fr.

* Based on diameter values reported on competitive websites at the time of this publication.

Teleflex is a global provider of medical technologies designed to improve the health and quality of people's lives. We apply purpose-driven innovation – a relentless pursuit of identifying unmet clinical needs – to benefit patients and healthcare providers. Our portfolio is diverse, with solutions in the fields of vascular and interventional access, surgical, anesthesia, cardiac care, urology, emergency medicine and respiratory care. Teleflex employees worldwide are united in the understanding that what we do every day makes a difference. For more information, please visit teleflex.com.

Teleflex is the home of Arrow, Deknatel, LMA, Pilling, QuikClot, Rüsch, UroLift, and Weck – trusted brands united by a common sense of purpose.

Please see the Instructions for Use for a complete listing of the indications, contraindications, warnings and precautions. The Turnpike Catheters are intended to be used to access discrete regions of the coronary and/or peripheral vasculature. They may be used to facilitate placement and exchange of guidewires and to subselectively infuse/deliver diagnostic and therapeutic agents. The Turnpike Spiral and Turnpike Gold catheters are contraindicated for use in vessels with an effective diameter smaller than 1 mm.
